

INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, JULY 7, 2000 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL

CURRENT SITUATION:

New large fires were reported in the Eastern Great Basin, Northern Rockies, and Rocky Mountain Areas. Continued dry and windy weather, along with forecast dry lightning in Utah and Colorado, will increase the potential for new fires. The National Interagency Coordination Center processed orders for airtankers, helicopters, air attack aircraft, infrared aircraft, caterers, shower units, radio equipment, meteorological equipment, crews, and miscellaneous overhead. Very high to extreme fire danger indices were reported in Colorado, Utah, Wyoming, Idaho, Nevada, Alaska, Oregon, California, Arizona, and South Dakota.

ROCKY MOUNTAIN AREA LARGE FIRES:

An Area Command Team (Mann) is assigned to manage the large fires in western Colorado and southwest Wyoming.

BUSTER FLATS, Dinosaur National Monument, NPS. A Type II Incident Management Team (Sisk) is assigned. This fire is burning in pinyon pine and juniper 75 miles northwest of Craig, CO in very steep terrain. Gusting winds and low relative humidities are challenging containment efforts. Precautionary evacuations of two campgrounds are still in effect.

WILD HORSE BASIN, Rock Springs District, BLM. A Type II Incident Management Team (Gardner) is assigned. This fire, near Rock Springs, WY, is burning in pinyon pine, juniper, sagebrush and grass. Observed fire behavior includes running, torching and crowning in juniper. The fire has crossed a creek and is burning east toward a powerline. Several structures are threatened.

CONE MOUNTAIN, Grand Junction District, BLM. A Type II Incident Management Team (Hartman) is assigned. This fire is burning in ponderosa pine, pinyon pine and juniper 38 miles southwest of Grand Junction, CO. Red flag conditions caused the fire to spot, torch and make short runs in heavy fuels. Crews are making significant progress on the west side of the fire. Historic mining structures, residences, a radio tower, and powerlines are threatened. Rough terrain and poor access are impeding containment efforts.

KLINGER, Craig District, BLM. This fire is 15 miles southwest of Rangley, CO. It is burning in pinyon pine and juniper fuels. The fire is threatening a pipeline, a pump station, and several structures. Another day of strong winds and low relative humidities resulted in containment difficulties.

DRY FORK, Medicine Bow National Forest. The fire is burning in cottonwood and greasewood trees in the Cheyenne River bottom, 14 miles northeast of Bill, WY. Efforts at containment are being hindered by heavy fuel loading and inaccessibility.

BLACK BUTTE, Rock Springs District, BLM. This fire is burning in grass, sagebrush and juniper near Rock Springs, WY. Power lines are threatened. No new information was received.

EASTERN GREAT BASIN AREA LARGE FIRES:

BORROW PIT, Salt Lake Field Office, BLM. A Type II Incident Management Team (Shell) is assigned. This fire is 20 miles southwest of Salt Lake City near Lake Point, UT. Three major communication sites on Farnsworth and Kessler Peaks are threatened. The fire is exhibiting extreme behavior with major runs up canyons. Burnout operations are planned for today.

12 MILE, Upper Columbia, Salmon/Clearwater District, BLM. A Type II Incident Management Team (Saleen) is assigned. The fire is 12 miles south of Salmon, ID. Light precipitation received yesterday morning aided the efforts of firefighters. Current threats are to wildlife habitat and timber resources. Three local residents were burned, two seriously, while attempting to extinguish the fire prior to the arrival of agency firefighters. A team is scheduled to arrive today to investigate the circumstances which led to the injuries.

ROCK CREEK, Wasatch-Cache National Forest. This fire is 20 miles east of Logan, UT. High winds, low relative humidities and extreme fire behavior have slowed the rate of containment. Torching and crowning fire behavior has been observed.

BELL MARE, Upper Snake River District, South-Central Idaho Area, BLM. The fire is 10 miles northwest of Bliss, ID. Crews are making good progress on fireline construction. Structures are no longer threatened. Containment was expected late last night.

CEDAR FIELD, Upper Snake River District, BLM. This fire is burning in sagebrush and juniper ten miles southwest of American Falls, ID. High winds, torching and spotting continue to cause containment problems. Cultural resources in Massacre Rocks State Park and wildlife habitat are threatened.

WORLEY DRAW, Lower Snake River District, BLM. This fire started on private land 35 miles southwest of Hagerman, ID and quickly spread onto BLM land. It is burning in grass and sagebrush. The current threat is to winter range for cattle.

ALASKA AREA LARGE FIRES:

Alaska currently has 24 unstaffed and uncontained fires in limited protection areas for 279,265 acres.

BERING CREEK, Tanana Zone, BLM. This fire is 35 miles southwest of Tanana. It was started by lightning on 6/14 in a limited suppression area. Crews prepared for a burnout operation and continued to protect native allotments on the Atutsak River. The north and south flanks are actively burning.

BEARPAW MOUNTAIN, Tanana Zone, BLM. The fire is burning in black spruce 100 miles southwest of Fairbanks. It was started on 6/24 by lightning. The fire is backing and creeping 3/4 of a mile from a cabin. Cabin protection operations are continuing at several locations.

ZITZIANA, Tanana Zone, BLM. This lightning-caused fire, which started on 6/13, is 85 miles west of Fairbanks. Firefighters are burning out around cabin sites at Wilderness Lake. Cabin protection is also ongoing at two other nearby lakes.

NORTHERN ROCKIES AREA LARGE FIRES:

WYANT COULEE, Eastern Land Office, Montana State Department of Natural Resources. This fire, 23 miles north of Colstrip, MT, was started by lightning on 7/4. The fire is burning in grass, sagebrush, thick juniper and ponderosa pine. Torching and spotting are causing control problems. One residence and several outbuildings are threatened.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

BROOMSEDGE, Hawaii Volcanoes National Park, NPS. This grass fire is burning 30 miles southwest of Hilo, HI. Crews are constructing fireline on the south flank of the fire and patrolling the north flank for hot spots. High relative humidities have been assisting containment efforts.

OUTLOOK:

*** A RED FLAG WARNING IS POSTED IN NORTHEAST UTAH AND NORTHWEST COLORADO FOR STRONG WINDS AND LOW RELATIVE HUMIDITIES ***

*** A RED FLAG WARNING IS POSTED IN MOST OF UTAH FOR STRONG SOUTH WINDS, LOW RELATIVE HUMIDITIES AND AN UNSTABLE AIRMASS ***

*** A RED FLAG WARNING IS POSTED IN SOUTHWEST AND CENTRAL WYOMING FOR LOW RELATIVE HUMIDITIES, STRONG WINDS AND AN UNSTABLE AIRMASS ***

*** A FIRE WEATHER WATCH IS POSTED IN SOUTHEAST UTAH AND SOUTHWEST COLORADO FOR ISOLATED TO WIDELY SCATTERED DRY THUNDERSTORMS AND LOW RELATIVE HUMIDITIES ***

*** A FIRE WEATHER WATCH IS POSTED IN EAST CENTRAL NEVADA FOR STRONG AND GUSTY WINDS AND LOW RELATIVE HUMIDITIES ***

A trough of low pressure will move over the northwest United States today, producing thunderstorms in parts of Oregon, California, Idaho, and Nevada. Ahead of the trough, conditions will be dry and quite windy in much of the Great Basin. Monsoon thunderstorms will occur in the southwest. Dry thunderstorms are possible in southeast Utah and southwest Colorado.

Winds in the warning areas will be southwest at 20 to 30 mph with gusts to 35 mph. Winds in Idaho will be 20 mph or less. Temperatures will range from the 70's in the mountain areas to near 100 in the deserts of southern Utah and Nevada. Minimum afternoon relative humidities will be 5 to 10 percent in the driest areas. Overnight humidity recovery will be under 30 percent.
